

MyEPV

Design your own reports

With MyEPV you can create virtually any report you need in just one minute

-

You can customize the MyEPV templates provided by setting simple parameters, to include combo-boxes, create navigation paths, set thresholds and much, much more

-

Standard EPV usability functions such as export to Excel, favourites, page scroll and column manager will automatically be added to your reports

-

MyEPV fully integrates with the other EPV products

EPV TECHNOLOGIES

IT Cost Under Control

Goal

EPV for z/OS delivers hundreds of out-of-the-box reports as HTML pages which cover virtually all of a customer's technical reporting needs.

MyEPV is a complete solution to design an unlimited number of additional customer specific and management oriented reports, using a set of ready-made templates which can be easily customized and adapted, and publish them on the EPV intranet web site.

Input

MyEPV's natural input source are the EPV for z/OS DBs.

However any MySQL, SQL Server DB or text files can also be used.

Output

MyEPV output is a set of navigable reports in HTML pages fully integrated with the other EPV products. Standard EPV usability functions such as export to Excel, favourites, page scroll and column manager are automatically added to MyEPV reports.

Installation

MyEPV can run on Windows, Unix or Linux.

The installation process takes just a few seconds.

Run

To run MyEPV you can execute line commands or schedule a .bat or .sh file which includes all the calls, one for each template, to the MyEPV program.

Pre-requisites

MyEPV requires MySQL or SQL Server.

A valid license and maintenance for EPV for z/OS is also needed.

Pricing

The product's pricing is based on the number of systems licensed for EPV for z/OS.
